Noise and Vibration in Construction

April 2006

AUS

DESIGNED FOR

Health and safety professionals, supervisors, managers, engineers and those non-safety people responsible for activities that expose operators to potential risks from hand-arm vibration, whole body vibration and noise at work.

COURSE OBJECTIVES

The course will provide participants with an understanding of their legal duties under current noise and vibration laws and an ability to assess and manage risks within the construction environment in a practical way.

COURSE CONTENT

Morning - Vibration at Work

- ✓ An introduction to vibration
- ✓ Legislation and standards
- ✓ HSE approach and expectations
- ✓ Symptoms of Hand-Arm Vibration Syndrome
- ✓ Assessment of Risk and Hierarchy of Control
- ✓ Hand-Arm Vibration Management Programme
- ✓ Measurement of Hand-Arm Vibration

Afternoon - Noise at Work

- ✓ An introduction to noise at work
- ✓ Legislation and Standards
- ✓ HSE Approach and Expectations
- ✓ Measurement of Noise
- ✓ Assessment of Risk and Hierarchy of Control
- ✓ Case Studies
